

## ORDER FORM

Fill out this document and send it via email to [nisioguitars@gmail.com](mailto:nisioguitars@gmail.com) to select the main features of your Primo.  
You will be contacted with a quote, and we will be able to discuss every detail together, even those not listed below.  
A deposit of €500 is required to secure your place in the production queue. The payment will then be completed once your instrument is finished.

For any questions or inquiry during the compilation, you can call Mattia at +39 3668006216.

### **\*\*NOTE: PRE-LAUNCH PRICE\*\***

The pre-launch price of €1990 is a way to thank customers for their trust in the PRIMO project. It will be valid until the official launch date, which is yet to be announced. This includes a standard or hollow body Nisio PRIMO with a single pickup, scale length of your choice, color of your choice, and a hard case. Any upgrades will be evaluated during the quoting process.  
Thank you for your trust.

### MODEL

The Primo can be built in a standard (solid body) or semi-hollow version:

PRIMO Standard .....  
PRIMO Semi-Hollow .....

### SCALE LENGHT

Choose the scale length:  
24.75 inches is the shorter scale, softer feel with lower string tension, but less versatile for tuning. The 25-inch scale offers slightly higher tension and is better suited for various tunings with the same string gauge.

24.75" .....  
25" .....

### WOODS

The standard Primo comes entirely in mahogany, with either an ebony or rosewood fretboard. Please specify below if you have any requests for different woods or combinations, and we will discuss the functionality and aesthetics of your specific instrument.

## FRETBOARD

Rosewood .....  
Ebony .....

If you are undecided, leave this field blank, and the best option will be recommended to you based on your Primo's features.

Notes:

## PICKUP CONFIGURATION

Choose the pickup configuration. A specific pickup brand and model can be chosen, or you can send your preferred pickups for installation. You can specify your preference here, or the quote will include the price for "standard" pickups chosen to perfectly match the PRIMO and the musical tastes you specify at the end of the form.

Single Humbucker at the bridge .....  
Double Humbucker .....  
Single P90 at the bridge .....  
Double P90 .....  
Other .....

Pickup Preference: .....

## COLOR

On the Nisio Guitars website, you can find some examples of colors for your Primo. Feel free to send other visual inspirations via email, such as photos of other guitars whose color you like or ideas for the finish. Use the "notes" section to explain the concept you have in mind.

Note: all PRIMO guitars have ABS binding on the front, back, and along the fretboard, which by default comes in white. If you have any other preferences, specify them in the notes.

Color chosen:  
Attached inspiration images: Yes ..... No .....

Notes:

## BRIDGE

The PRIMO can be equipped with two bridge models, both in a wrap-around style:  
The Faber is a more vintage-styled, open sounding, lightweight bridge, highly resonant but not individually adjustable for intonation. The Schaller Signum, on the other hand, is a more contemporary, heavier bridge offering greater sustain, with full adjustability. Both bridges are "locking," meaning they can be secured to the body for better vibration transfer.

Faber Locking Bridge .....  
Schaller Signum Locking Bridge .....

## ELECTRONICS CONFIGURATION

By default, the PRIMO has a volume and tone control, along with a three-way selector in case of dual pickups, but you can choose the configuration you prefer.

Notes: .....

## NECK PROFILE

Each Nisio neck is hand-carved, using predefined templates for reference. For this reason, the profile choice is indicative, giving an idea of the type of neck the customer is used to. The neck will then be shaped to match the template and be as comfortable as possible.

Nisio FAT Profile .....  
Nisio Slim Profile .....

Both profiles are inspired by what other brands call a "Medium C." The neck, in either version, is very comfortable and versatile from the first to the last fret. Regardless of this, you can still specify any particular requests in the notes:

Notes: .....

## CARBON FIBER REINFORCEMENT

Two carbon fiber rods that run the length of the neck. A well-made neck is stable in any condition, but the reinforcement adds extra insurance against thermal and environmental changes (ideal for musicians who travel a lot in varied conditions) or for those who frequently and drastically change string gauges.

Yes .....  
No .....

## STRINGS

Knowing which strings you usually use allows us to perform the final setup according to your needs. Primo guitars are assembled by default for a 0.10-0.46 set. Feel free to ask for advice if you're unsure.

Preferred string gauge: .....  
Notes: .....

## GENRE AND INSTRUMENT APPLICATION

Tell us in which contexts you plan to use your Primo, the musical genre you usually play, or any other important details to help us advise you better on configuring your guitar:

## NOTES:

Use the space below to specify any additional details that are not listed in the form, ask for clarifications, or request explanations. We will discuss them after receiving this document.
